Java Developer

PRASHANT NANDANWAR

Email: nandanwarprashant469@gmail.com
Mobile: 8390535956
DOB: 03-06-1998
City : Kolkata

OBJECTIVE

"Dedicated Java Developer with a focus on backend development, combining technical expertise with a passion for crafting efficient and scalable solutions. Proficient in Java, Spring Boot, Hibernate, and RESTful APIs. Committed to delivering high-quality code and collaborating effectively within cross-functional teams. Seeking a challenging role to contribute to the development of innovative applications and leverage my skills to drive technical excellence".

EDUCATION

Bachelor's of Technology
Rashtrasant Tukadoji Maharaj Nagpur University, Maharashtra.

TECHNICAL SKILLS

Programming Languages	**Java 8,Java 17, Java/J2ee**
Spring Framework	Spring Boot, Spring MVC
RESTful APIs	API design, Implementation
Security	Authentication, Authorization, Encryption
IDEs	Eclipse, IntelliJ IDEA, STS
Build Tools	Maven
Testing	Postman,Debuging,SLF4J
Third-party	Bank Integration, Api Integration (Payin & Payout)
Web Services	RESTful APIs, JSON
Database Management	MSSQL, Hibernate
Deployment	AWS

CORE COMPETENCIES

- Strong understanding of **OOPs concepts** in Java.
- Design, Develop, implement, and maintain java application.
- Hand-on with **MVC architecture,** including Controller, Service and Repository layers.
- Proficient in designing and managing **database schemas** using MYSQL and Hibernate JPA.
- Developing entity class using **encapsulation** concept.
- Knowledge of PDF generation and file export in web applications.
- Skilled in API testing and documentation using Postman.
- Secure data handling via encryption and exception handling mechanisms.
- Developing third-party APIs and service.

EXPERIENCE: JAVA BACKEND DEVELOPER

SambhavPay Payment Solutions Pvt. Ltd.

- Experience : October 2023 – May 2026
- Designation : Java Backend Developer

HelloPe Financial Services Pvt. Ltd.

- Experience : May 2026 -Present
- Designation :Senior Java Developer

PROJECT DETAILS

- ProjectName : ***Payin& Payout Payment System, BBPS,DMT,AEPS***
- Duration : 3+ Years
- Technologies : Core Java, J2EE,Springboot,SpringMVC, HibernateJPA,MSSQL,RESTful APIs.
- Tools : Spring Tool Suite (STS), POSTMAN

Project Description: PAYIN and PAYOUT Payment System

Developed a Payin and Payout payment system using Spring Boot for efficient, scalable development. Integrated Hibernate and JPA with an MSSQL database for seamless data management. Created RESTful APIs with Spring MVC to enhance user interactions. Implemented rigorous data validation and incorporated encryption techniques to safeguard sensitive information, ensuring a secure platform for transactions.

ROLES AND RESPONSIBILITIES

- Developed **Pay-In and Pay-Out modules** using **Spring Boot, JPA, and RESTful APIs**.
- Designed and implemented **secure data encryption** mechanisms for handling sensitive financial information.
- Designed, developed, and documented **RESTful APIs** for Pay-In and Pay-Out payment processing workflows.
- Utilized **ModelMapper** to efficiently map **DTOs and Entity classes**, reducing boilerplate code.
- Integrated **third-party payment gateways** and SMS APIs for seamless transactions and alerts.
- Designed and optimized MYSQL database schema, ensuring high availability and performance.
- Implemented **input validation and global exception handling** to maintain data integrity and improve user experience.
- Utilized **spring profiles** to manage configuration variations across different deployment environment.
- Deployed the application on **AWS** for quality assurance testing, ensuring readiness for production environments.
- Implemented **pagination** for search results, enhancing user experience in managing large datasets.
- Developed and maintained **backend services** for internal content management and client reporting systems.
- Developed **Bulk Payout APIs** and integrated **Banking APIs** (UPI, Payout services).
- Worked on **database migration from MSSQL to MySQL**, ensuring data consistency and minimal downtime.
- Developed **real-time webhook posting modules** for transaction status updates.
- Designed and implemented **Pay-In wallet modules** with balance tracking and transaction management.
- Implemented **comprehensive logging and log monitoring** using **SLF4J/Logback** to track API requests, responses, transaction status, and error scenarios.
- Designed and implemented **secure login mechanisms** using **JWT-based token authentication**, along with **IP address and geo-location tracking** to monitor and secure user access.

- Implemented multiple Pay-in integrations (Intent & Collect) with vendors such as **ISERVEU, ENKASH, UNLIMIT, SUBPAISA**, and **DigiCart**, and Payout integrations with **BenakPay, UniqPay, PayGlobal**, and **RBL Bank, IDFC Bank** using Spring Boot-based REST APIs.
- Experience with JWT authentication and role-based authorization.
- Developed webhook integrations and payment gateway APIs.
- Worked on UPI Intent, UPI Collect, Static QR and Dynamic QR modules.
- Optimized SQL queries and implemented pagination and global exception handling.
- Integrated third-party **Crypto On-Ramp** and **Off-Ramp** APIs using Java and Spring Boot to enable fiat-to-crypto purchases and crypto-to-fiat withdrawals.
- Developed REST APIs for crypto order creation, transaction processing, status tracking, and lifecycle management.
- Implemented provider webhook integration to process asynchronous transaction updates and maintain transaction status consistency.
- Developed bank account linking, validation, and transaction fee calculation workflows for crypto off-ramp operations.
- Implemented request validation, exception handling, and MySQL-based transaction persistence to improve integration reliability.
