Java Developer

PRASHANT NANDANWAR

Email: nandanwarprashant469@gmail.com
Mobile: 8390535956
DOB: 03-06-1998
City: Delhi

OBJECTIVE

"Dedicated Java Developer with a focus on backend development, combining technical expertise with a passion for crafting efficient and scalable solutions. Proficient in Java, Spring Boot, Hibernate, and RESTful APIs. Committed to delivering high-quality code and collaborating effectively within cross-functional teams. Seeking a challenging role to contribute to the development of innovative applications and leverage my skills to drive technical excellence".

EDUCATION

Bachelor's of Technology
Rashtrasant Tukadoji Maharaj Nagpur University, Maharashtra.

TECHNICAL SKILLS

Programming Languages	**Java 8, Java/J2ee**
Spring Framework	Spring Boot, Spring MVC
RESTful APIs	API design, implementation
Security	Authentication, Authorization, Encryption
IDEs	Eclipse, IntelliJ IDEA, STS
Build Tools	Maven
Testing	Postman,Debuging
Third-party	SMS Integration, Api Integration
Web Services	RESTful APIs, JSON
Database Management	MSSQL, Hibernate
Deployment	AWS

CORE COMPETENCIES

- Strong understanding of **OOPs concepts** in Java.
- Design, Develop, implement, and maintain java application.
- Hand-on with **MVC architecture,** including Controller, Service and Repository layers.
- Proficient in designing and managing **database schemas** using MYSQL and Hibernate JPA.
- Developing entity class using **encapsulation** concept.
- Knowledge of PDF generation and file export in web applications.
- Skilled in API testing and documentation using Postman.
- Secure data handling via encryption and exception handling mechanisms.
- Developing third-party APIs and service.

EXPERIENCE: JAVA BACKEND DEVELOPER

Digital Caption Technologies (October 2022 – October 2023)

Project: *Client Management System*

Technology Stack: Java, Spring Boot, Spring MVC, Hibernate, MSSQL, REST APIs

SambhavPay Payment Solutions Pvt. Ltd.

- Experience : October 2023 - Present
- Designation : Java Backed Developer

PROJECT DETAILS

- Project Name : *Payin & Payout Payment System, BBPS ,DMT*
- Duration : 1.5+ Years
- Technologies : Core Java, J2EE, Spring boot, Spring MVC, Hibernate JPA, MSSQL, RESTful APIs.
- Tools : Spring Tool Suite (STS), POSTMAN

Project Description: PAYIN and PAYOUT Payment System

Developed a Payin and Payout payment system using Spring Boot for efficient, scalable development. Integrated Hibernate and JPA with an MSSQL database for seamless data management. Created RESTful APIs with Spring MVC to enhance user interactions. Implemented rigorous data validation and incorporated encryption techniques to safeguard sensitive information, ensuring a secure platform for transactions.

ROLES AND RESPONSIBILITIES

- Developed **Payin** and **Payout** modules using **Spring Boot**, **JPA** and **REST APIs**.
- Designed and implemented secure data **encryption** for sensitive information.
- Designed and documented RESTful APIs for **Payin** and **Payout** payment processing functionalities.
- Used ModelMapper to efficiently map DTOs and Entity classes.
- Integrated **third-party payment gateways** and SMS APIs for seamless transactions and alerts.
- Designed and optimized MYSQL database schema, ensuring high availability and performance.
- Implemented **validation** and **exception handling** mechanisms to ensure data integrity and provide a user-friendly experience.
- Utilized **spring profiles** to manage configuration variations across different deployment environment.
- Deployed the application on **AWS** for quality assurance testing, ensuring readiness for production environments.
- Implemented **pagination** for search results, enhancing user experience in managing large datasets.
- Developed and maintained **backend services** for internal content management and client reporting systems.
